

UPLOAD DATA VIA WIFI WITHOUT COMPUTER

LTI-WIFI

Desktop WiFi Interface Cradle

LogTag Recorders

The LogTag LTI-WiFi wireless interface is a high-speed 802.11/b/g/n compatible device that connects to your WiFi network.

The LogTag® LTI-WiFi interface cradle allows download of standard LogTag loggers with 3 silver contact pins and uploads data to LogTag Online, LogTag's secure cloud server.

*TRED30-16R and external probe in the image sold separately

Features

Connects to LogTag Online, a cloud server solution for viewing, analyzing and storing data.

Easily set up to work with your WiFi network.

Buffers up to 48 full memory logger downloads during loss of network connectivity.

Uploaded data is immediately available for viewing in LogTag Online.

Downloaded data is fully encrypted and automatically uploaded to a secure LogTag cloud server.

Inbuilt LED indicators show data download and network access status.

Applications

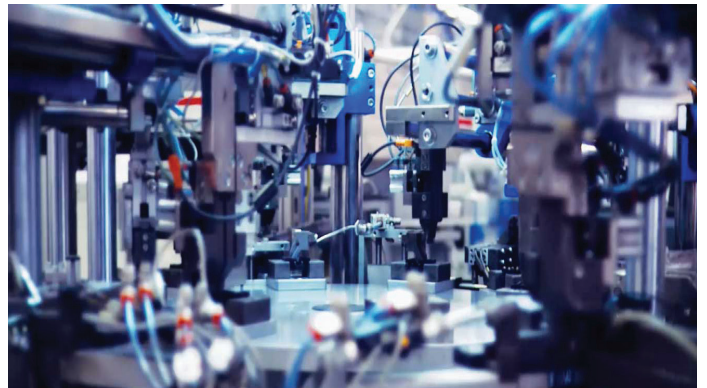

Healthcare

Clinic

Transportation

Industrial

Chemicals

Indoor Spaces

Specifications
